Yu An (Joanna) Yeh

Seattle, WA | (949) 656-5872 | joannayeh01@gmail.com | linkedin.com/in/yu-an-yeh

SUMMARY

- Analytics and data engineer with 10+ years building the metrics, data models, and pipelines that help new business lines scale. Combines analytics (causal impact analysis, experimentation) with data engineering (Salesforce migration, automated pipelines, data quality checks). Progressed at DoorDash from Associate Manager, Sales Analytics to Staff Analytics Engineer, and now own a real-time event pipeline. Skilled in SQL, Python, Snowflake, Airflow, and AWS.

TECHNICAL SKILLS

Languages & Warehousing: Python, R, Snowflake, Postgres, MySQL, BigQuery, SOQL
Pipelines & Modeling: Airflow, dbt, Data Modeling, ETL/ELT
Cloud & Tooling: AWS (ECS, EC2, Eventbridge, CloudWatch, DynamoDB), Docker, Kubernetes, Terraform, Git, CI/CD, Grafana
BI & Business Systems: Salesforce, Sigma, Tableau, Mode, Looker, Google Analytics, Excel

WORK EXPERIENCE

DoorDash **Seattle, WA | Jun 2022 – Present**

Senior Software Engineer, GTM and Merchant Engineering June 2026 – *Present*

- Ramped up in 1 week as DRI for a Kafka-to-Salesforce event-driven pipeline (via EventBridge Pipes and SQS), enhancing throughput, error handling, and reliability for GTM systems.
- Engineered the core data sync architecture for a self-serve merchant onboarding prototype, connecting 1P databases to Salesforce for near-real-time store activation tracking.

Staff Analytics Engineer, GTM Data Oct 2025 – June 2026

- Led an 8-person team through a Salesforce migration and data model mapping, covering the whole sales pipeline data from presale, onboarding, to post-sales. Airflow pipelines automated transformations and validation, keeping manual data fixes below 5%.
- Engineered an end-to-end automated lead ingestion workflow across multi-object Salesforce schemas, reducing upload turnaround from 7–14 days to 1–2 days, and designed it to also support another team's month-long upload process.
- Re-architected the account deduplication service, cutting processing time from up to a week to under 5 minutes, and owns a self-serve merge tool that processes unlimited requests per day across enterprise, mid-market, and SMB accounts.
- Built shared Python utilities (data processing, Salesforce/Snowflake helpers) and review standards, accelerating team onboarding.

Associate Manager, Sales Analytics & Data Infrastructure *Jun 2022* – Oct 2025

- Built sales attainment trackers, a standardized payout audit process, and Snowflake snapshot tables for historical performance, reducing payout disputes from ~250 per quarter to fewer than 5.
- Optimized sales planning and opportunity sizing for New Verticals using causal impact analysis and statistical evaluation, informing prioritization that contributed to a 26% quarter-over-quarter increase in GMV.
- Improved merchant onboarding and early-success programs through quantitative analysis and experimentation, increasing the number of stores reaching first-month activation by 23%.

Cognitiv | *AI-powered programmatic advertising* **Bellevue, WA**

Senior Data Analyst *Apr 2022 – Jun 2022*

Data Analyst *Nov 2020 – Apr 2022*

- Architected scalable data pipelines and dashboard backends managing over a billion log-level records.
- Refined retargeting and prospecting strategies with the Strategy team through user segmentation, contextual optimization, bid algorithms, and experiment design, driving 7.46x ROAS and a 96% conversion lift.
- Evaluated model and experiment performance with statistical methods, delivering recommendations to data scientists and ML engineers that produced 23% incrementality in model-based strategies.

Codementor | *developer mentorship platform and marketplace* **Palo Alto, CA**

Product Analyst *Feb 2019 – Jul 2019*

- Drove product growth strategy with product and marketing teams using experimentation and data science techniques, increasing daily active users and conversion rate by 25%.
- Led analyses on funnel optimization, cohort retention, and monetization; partnered with engineers on data engineering, database performance tuning, and process automation.

EARLIER EXPERIENCE

Codementor — Data Analyst, Taipei | Feb 2019 – Jul 2019. Led product growth experiments and funnel analyses to boost Daily Active User and conversion by 25%; collaborated with engineering on database performance tuning and data process automation.

Bits x Bites — Data Analyst, Shanghai | Jun 2016 – Jul 2017. Led supply-chain digitization for food-industry clients: optimized dealer ERP workflows and built Tableau dashboards for sales and operations teams.

Kaytune CRM — CRM Consultant & Account Manager, Shanghai | May 2014 – Jun 2016. Ran omni-channel loyalty programs and A/B-tested campaigns contributing to an 87% sales lift; managed CDP and chatbot development, cutting service costs 20%.

EDUCATION

University of California, Irvine — M.S., Business Analytics *July 2019 - Jun 2020*

Data Science Practicum with Experian — Built ML classification models predicting customer loan default at 84% recall.

National Taipei University — B.B.A., Business Administration *Sep 2010 - Jun 2014*
